**But,
What is LIVE?**

Today, broadcasting a show requires a studio with camera operators, directors, assistants and more.

Content generators, influencers, youtubers, hosts, audiences and others don't have any access to tools that allows them to have more than the social network "live".

They do not have options to interact with their audience or friends on the same screen.

To get a "TV & Podcast Show" format product, it's necessary to have many pre-production and editing software and apps.

Too much time is wasted editing content because they don't have the opportunity to do it "live".

And of course, costs are high for content generators.

**THERE IS NO OTHER APP
THAT ALLOWS YOU TO MAKE A SHOW
WITHOUT A STUDIO**

A high-resolution image of Earth from space, showing the Western Hemisphere. The Earth is centered, with North America, South America, and parts of Europe and Africa visible. The planet is set against a black background filled with numerous small white stars. Overlaid across the center of the Earth is the word "ANYWHERE" in a large, bold, cyan-colored font. The text has a slight reflection effect on the surface of the planet below it.
